Health has never been a standalone concept. Humans, animals, and the environment are interconnected elements of the same life cycle, each influencing the other. Maintaining this balance is essential for sustainable practice and long-term continuity.

Dedeks focuses on animal health and develops solutions based on scientific principles, technical competence, and consistent quality standards. Its research-driven product portfolio is designed to support veterinarians and healthcare professionals with practical, reliable, and accessible tools for everyday use in the field. This approach allows Dedeks to respond effectively to changing

Since 2022, Dedeks has operated with an understanding that extends beyond product supply, emphasizing availability, consistency, and trust as integral elements of its operations. Starting in Turkey, this approach has steadily expanded into international markets and is now present across Europe, the Middle East, and Asia.

Through long-term collaborations and efficient distribution networks, Dedeks aims to contribute lasting value to animal health practices. For us, health is not only about meeting current requirements, but also about supporting responsible practice for the future.

Expanding to more
countries every day.

Approaching Our 4th Year, A Story Extending Borders

We make our animal health solutions accessible across a broader geography each day. Through our products and strengthening distribution structure, we connect with veterinarians and breeders in different regions of the world.

Stethoscopes

DEDEKS® stethoscopes are clinical diagnostic instruments designed for the assessment of cardiac, pulmonary, and abdominal sounds. With models suitable for different areas of use, they support the diagnostic and examination processes of veterinarians and healthcare professionals.

DEDEKS® Dual Frequency Stethoscope

Cat.No	Model	MOQ	Barcode
HL010101	Dual Frequency Stethoscope	25 pcs	8683735914013

Suitable for use on both humans and animals, this dual-head stethoscope is an effective diagnostic tool for evaluating heart, lung, and abdominal sounds. Its clear sound transmission supports accurate examinations and reliable clinical assessment.

DEDEKS® Classic DualScope II

Cat.No	Model	MOQ	Barcode
HL010202	Classic DualScope II	25 pcs	8683735914013

Provides clear and consistent sound transmission for the evaluation of cardiac, pulmonary, and abdominal sounds. Its ergonomic design ensures comfort during extended use and makes it well suited for daily clinical practice in veterinary settings.

DEDEKS®

Self-Adhesive Elastic Bandages

Manufactured from nonwoven polyester fabric with a porous structure and elastic form, these self-adherent elastic bandages are 450 cm in length. They adhere only to themselves and do not stick to any skin.

Digital Thermometers

DEDEKS® digital thermometers are designed for clinical measurements related to human health. With fast measurement time and a clear digital display, they provide practical and reliable use in daily medical applications. Their ergonomic design ensures ease of use during repeated measurements.

DEDEKS®
Digital Thermometer I

Cat. No	Model	MOQ	Barcode
HLO401	DT113	25 pcs	8683735914310

Designed for clinical and daily measurements related to human health. Enables fast and reliable measurement of body temperature. With its clear digital display, measurement results are easy to read and store. A reliable choice for routine clinical practice.

DEDEKS®
Dijital Thermometer II

Cat. No	Model	MOQ	Barcode
HLO402	DT116	25 pcs	8683735914327

Its advanced ergonomic design provides a controlled and stable grip during measurement. The audible alert system notifies the user when the measurement is complete, ensuring practical use. The automatic shut-off feature supports energy efficiency. Developed for professional clinical use.

DEDEKS®
Dijital Thermometer III

Cat. No	Model	MOQ	Barcode
HLO403	DT119	25 pcs	8683735914334

With its compact and simple design, it is suitable for routine clinical and daily measurements. Supports different applications thanks to its compatibility with oral, axillary, and rectal measurements. Provides practical and reliable performance with a clear LCD display and fast measurement time.

DEDEKS®
Lubricating Gel
1000 ml

A transparent, water-soluble lubricating gel suitable for use in gynecological, endoscopic, colonoscopic, rectoscopic examinations, and probe-assisted procedures. Designed to ensure smooth application and ease of use during clinical interventions.

Health connects, all living beings.

Health is where all living beings intersect; our responsibility is to develop solutions that protect this balance.

DEDEKS®

Protecting family is our instinct.

We act with an awareness of the responsibility carried by a global brand, shaped by a mother's sensitivity and a veterinarian's precision. We view health not merely as an outcome, but as a value that must be carefully protected at every stage.

By placing science, continuity, and trust at the center of solutions that touch both human and animal life, we work toward a single purpose. From products that perform quietly and reliably in daily use to solutions that play a critical role in professional practice, our aim remains the same: to protect life.

For us, health is not only about today—it is a responsibility we take on for tomorrow as well.

Vetlife

Products for clinical use, injection, emergency response, and field applications.

Injectors

Injection products play a critical role in ensuring that medications and vaccines are administered accurately, safely, and in a controlled manner in veterinary practice. DEDEKS® injectors are developed with ergonomic designs and durable construction, providing reliable solutions for field and clinical applications.

DEDEKS® Automatic Injector

Catalog No	Model	MOQ	Barcode
VL010101	1 ml	40 pcs	8683735910671
VL010102	2 ml	40 pcs	8683735910336
VL010105	5 ml	40 pcs	8683735910343

Thanks to its compact design, it enables efficient use within a short time, especially in livestock operations with high animal density such as cattle, sheep, and pigs. Its ergonomic handle allows controlled and comfortable injection, while the adjustable dosing mechanism enables accurate dosing from 5 ml down to micro volumes when required.

DEDEKS® Multi Matic Injektor

Catalog No	Model	MOQ	Barcode
VL0102025	25 ml	20 pcs	8683735910596
VL0102050	50 ml	20 pcs	8683735910602

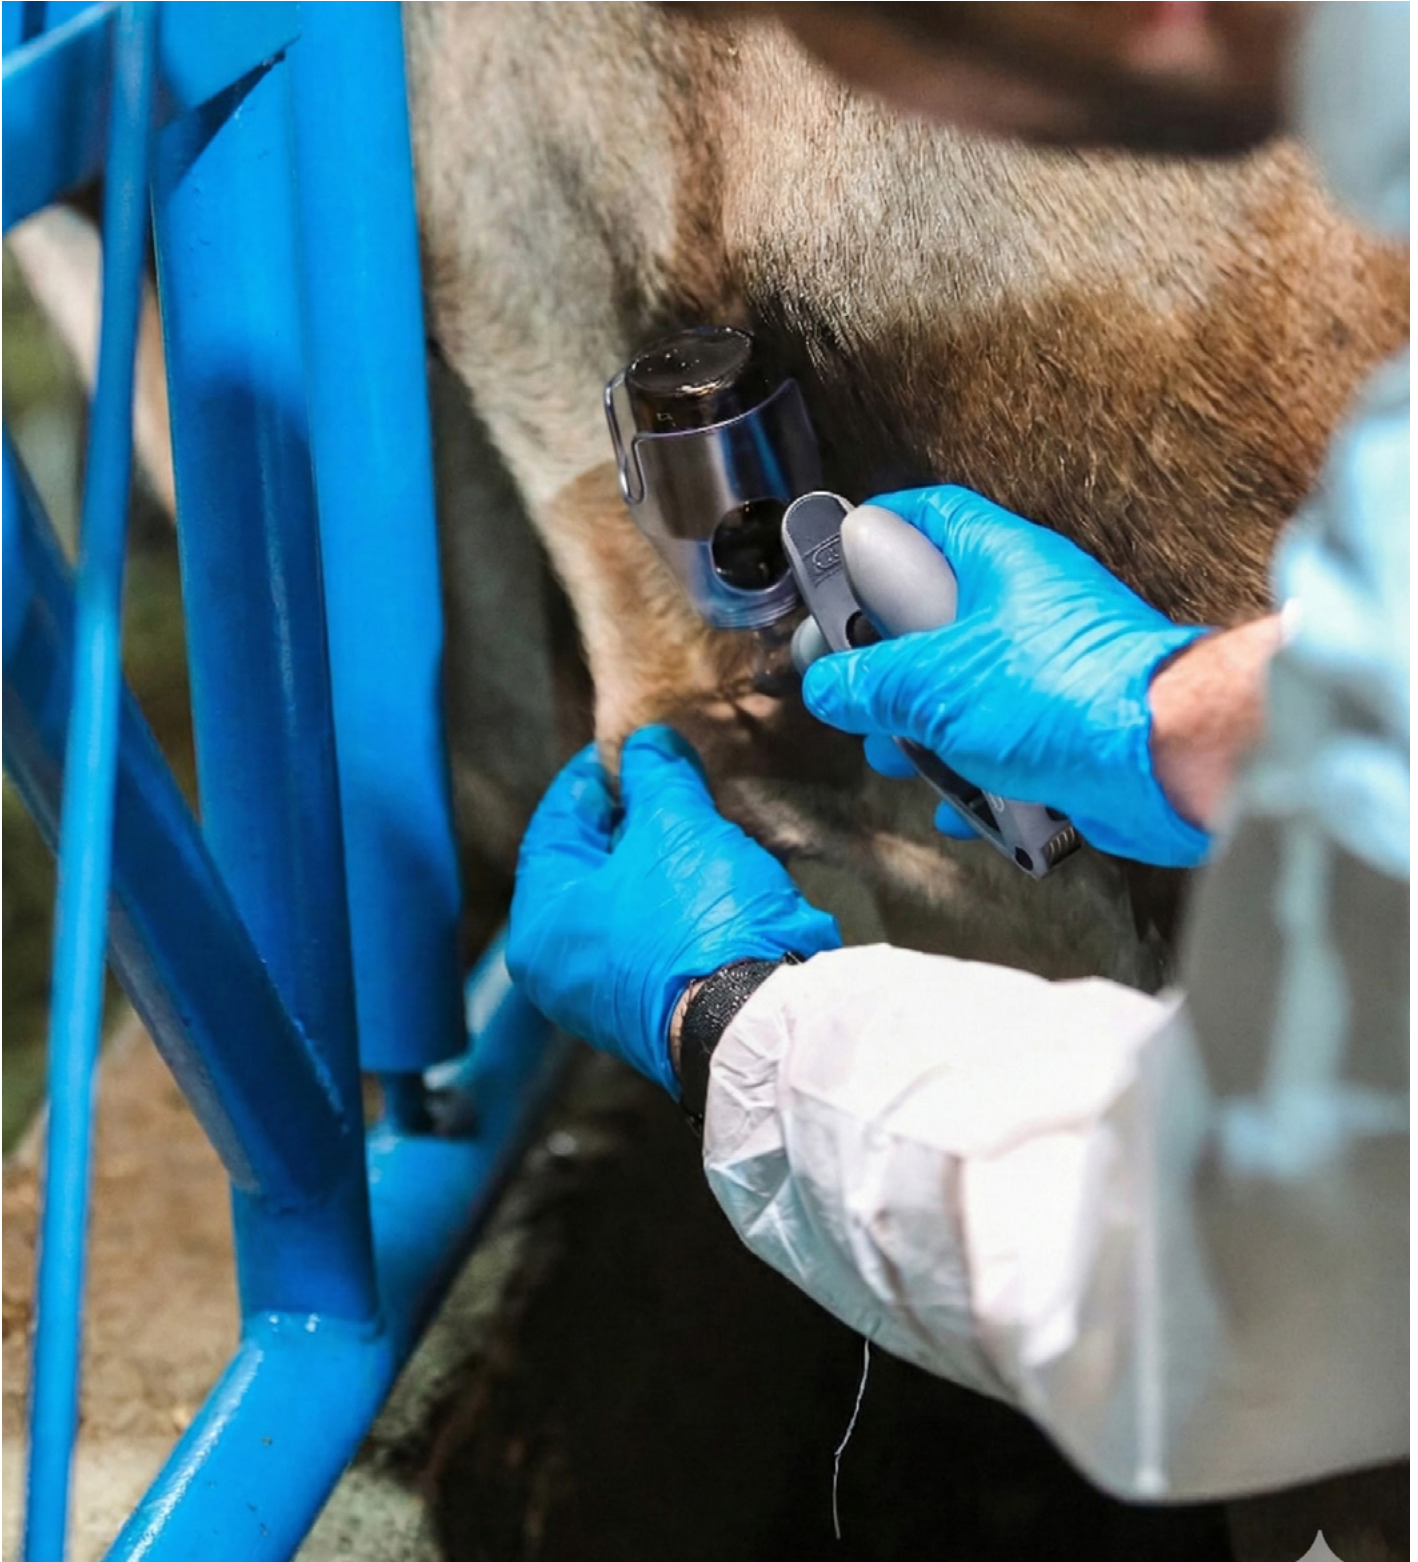

Designed for rapid and practical use in massvaccination and medication applications. With its easily adjustable dosing dial, it allows precise injections in the 0.5–25 ml and 1–50 ml ranges, depending on the model. After the medication or vaccine is drawn into the bottle, the desired dose can be set via the adjustment dial for controlled administration.

DEDEKS® Metal Automatic Injector

Catalog No	Model	MOQ	Barcode

Metal Hypodermic Needles

Due to differences in physiological structure and body weight among animal species, the size and characteristics of needles used in veterinary injections vary significantly. From fish weighing only a few hundred grams to large livestock reaching several tons, a single needle type cannot meet all requirements.

DEDEKS® metal hypodermic needles are manufactured from stainless steel using precision cutting technology to address these diverse needs.

They provide reliable use in subdermal, intradermal, and intramuscular injections across a wide range of species including cattle, sheep, pigs, poultry, fish, and camels. Produced in various size options, the needles are suitable for single use and compatible with automatic injectors. When reprocessing is permitted under appropriate conditions, their structure supports long-term and economical use.

Each needle size is color-coded, clearly marked by diameter, and labeled with barcode information in compliance with ISO standards.

Single-Use Hypodermic Needles

Injection of vaccines, medications, and vitamins into the living body requires sterile conditions in both human and animal healthcare. Selecting the correct needle according to the application method and the formulation of the medication is essential.

DEDEKS® single-use hypodermic needles are sterile manufactured in compliance with CE standards and are compatible with both single-use and multi-dose automatic injectors. Available in different sizes for subdermal, intradermal, and intramuscular applications, the needles are made of stainless steel with a sharp tip structure. Each unit is supplied in individual sterile packaging and features non-pyrogenic, non-toxic properties.

DEDEKS®

Veterinary Examination Table

Manufactured from stainless steel, the veterinary examination table features a smooth, easy-to-disinfect surface for animal examinations and surgical procedures. Its motorized height adjustment supports ergonomic working conditions for both animal comfort and veterinary efficiency.

Hoof trimming discs are compatible with angle grinders, allowing fast and controlled hoof care for cattle and horses. Their lightweight aluminum alloy bodies provide comfort during prolonged use, while specially designed blades ensure safe and even trimming.

DEDEKS®

BOVI-DEKS™ Hoof Block Adhesive

BOVI-DEKS™ is a polyurethane-based, two-component, fast-curing adhesive developed for bonding wooden or polyurethane hoof blocks to the bovine claw. At an ambient temperature of 20 °C, it cures in approximately 20–30 seconds. By transferring the load to the applied block, it helps reduce pressure on the affected claw and supports the healing process.

Applied to a clean and dry hoof using a dedicated mixing nozzle and applicator gun, the adhesive fixes the block in a short time with light pressure and achieves full cure within 2–3 minutes. Proper application ensures strong adhesion and provides safe, controlled use.

Petlife

Veterinary clinic and companion
animal care products.

Veterinary Clinic Equipment

This product group is designed for daily clinical use in veterinary practices, covering examination, care, and protective applications. Developed to support routine clinical workflows, the range offers practical, reliable equipment with durable construction and functional design, suitable for professional use.

CUTE-CAT™ Cat Handling Gloves

Catalog No	Model	MOQ	Barcode
PL0101	Cute-Cat Veterinary Cat Handling Gloves	12 pcs	8683735910619
PL0102	Cute-Dog Veterinary Dog Handling Gloves	12 pcs	8683735913870

Designed to protect veterinarians during examination and handling, the CUTE-CAT™ cat handling gloves help reduce the risk of scratches and bites. They allow controlled handling while supporting safe and efficient routine clinical procedures.

DEDEKS® Post-Operative Recovery Cone

Catalog No	Model	MOQ	Barcode
PL0201	Stitched Recovery Cone	10 pcs	See page 36
PL0202	Seamless Recovery Cone	10 pcs	See page 36
PL0203	Recovery Cone Neck Strap	10 pcs	See page 36

Designed to help prevent animals from licking or interfering with surgical sites and wounds during the post-operative period. Suitable for cats and dogs, the collar supports safe recovery. Selection should be based on the animal's temperament, procedure type, and body size.

DEDEKS® Cat Catheter

Designed for urinary drainage and fluid applications in feline patients. Flexible construction and appropriate sizing support controlled use and animal comfort in routine clinical procedures.

DEDEKS® Pill Popper

Designed for safe and accurate oral medication in small animals. The soft, flexible structure allows easy placement and supports stress-reduced administration for both clinical and home use.

Neck Identification Numbers

Designed to support animal identification, record keeping, and herd management in both large and small ruminants. Used together with ear tags and other identification systems, it enables fast and accurate on-site monitoring of animal health status, feeding, quarantine, and breeding records. Manufactured from durable plastic and numbered with indelible ink, allowing long-term technical use. Compatible with straps up to 40 mm, with a break- and tear-resistant structure suitable for demanding field conditions.
